SUMMARY

Computer Science Engineer specializing in Data Science and Analytics. Expert in Python, SQL, AWS, and Power BI with a focus on end-to-end data integrity. Experienced in leading data annotation and QA workflows to deliver high-accuracy datasets for ML applications.

EDUCATION

Shree Devi Institute of Technology 2021 - 2025

Bachelor of Engineering in Computer Science

CGPA: 7.88

TECHNICAL SKILLS

Programming : Python, SQL.

Data Tools : Power BI ,ETL, Data Visualization.

Cloud & Frameworks : AWS (S3, EC2), Flask, Streamlit.

Machine Learning: Tensorflow,CNN, BERT, ResNet-50.

EXPERIENCE

Xtransmatrix Consulting Service Pvt Ltd. **Jan - Mar 2026**

Data Annotator - Intern

- Led a team of annotators to deliver high-quality data annotation and transcription aligned with project guidelines.
- Performed dataset audits (ITN, casing, metadata) to reduce errors and improve data quality.
- Analyzed workflow performance and reported insights to streamline the data delivery pipeline.
- Worked on multi-modal datasets including text, audio, video, and image annotation, ensuring high accuracy and consistency.

ZIDIO Development. **Jun - Sep 2025**

Data Science & Analytics - Intern

- Built scalable data pipelines and applied ML models for actionable insights and Worked on multiple real-world dataset and optimized data preprocessing .
- Resolved challenges through strategic problem-solving, analytical thinking and developed effective communication, boosting overall team performance.

Rooman Technologies. **Feb - April 2025**

Cloud Application Developer - Intern

- Collaborated with IBM, IIT Guwahati, and Wadhwani Foundation on an cloud learning platform.
- Deployed scalable web hosting solutions improving performance and reliability.
- Utilized cloud infrastructure and deployment.

PROJECTS

Meme Sentiment Analysis

- Built an web application integrating machine learning and CNN in a multimodal system to detect sentiment classification(from very positive to very negative) user uploaded meme images.
- implemented data cleaning and preprocessing using ResNet-50 for image feature extraction and BERT for text sentiment analysis .
- Developed full stack web application using Flask as backend and React.js + Node.js as frontend for real-time inference.

Stock Market Analysis & Forecasting Dashboard

- Developed a Streamlit app to visualize and analyze real-time Indian stock market data.
- Integrated Machine Learning for time-series forecasting to identify market trends and future price movements.
- Engineered a scalable data flow using AWS S3 for storage and IAM Roles for secure, programmatic result exports.

Real-estate Price Prediction

- Built a web application integrating machine learning to predict property prices based on location, BHK, area.
- Trained by Random Forest Regressor on real world housing data to generate accurate price prediction.
- Developed using Flask for interactive input and instant price predictions.

Financial Loan Data Analysis Power BI Dashboard

- Developed an interactive Power BI dashboard to analyze 38K+ financial loan records and identify borrower risk trends.
- Performed data cleaning transformation in Power Query and SQL to ensure data accuracy and consistency.
- Created KPIs and DAX measures(loan funded & received, total payments ,loan-to-income ratio)for business insights.
- Visualized loan distribution, income vs default patterns, and interest rate trends to support data-driven decisions.

CERTIFICATIONS

- Data Analytics, Deloitte Australia (2025)
- Data Science & Analytics, ZIDIO Development (2025)
- Cloud Application Developer, ROOMAN Technologies (2025)
- Data Analytics with Python, IBM Cognitive Class (2024)
- Data Science , Codelabs System(2023)

LANGUAGES

- English
- Kannada
- Hindi
- Tulu

ACHIEVEMENTS

- Won two consecutive Awards in Technical Gaming event at college.
- Volunteered and coordinated student participation and successfully organized technical event demonstrating leadership and teamwork skills.
