SUMMARY

Computer Science graduate and Data Analytics Professional with experience in ETL pipelines, data visualization, and cloud analytics using Python, SQL, Power BI, and AWS. Delivered end-to-end data solutions with measurable business impact, backed by a strong foundation in statistical analysis, KPI reporting, and data-driven decision making

SKILLS

Programming

SQL, Python

Frameworks

Flask, Streamlit

Libraries

Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn

Cloud

AWS (S3, EC2, Athena, IAM)

Data Tools

Power BI, Excel, DAX, Power Query

Developer Tools

Git, GitHub, Jupyter Notebook

EDUCATION

B.E in Computer Science, Shree Devi Institute of Technology, Mangalore (2025)

2021 – 2025

• CGPA: 7.88

Mangalore

EXPERIENCE

Xtransmatrix Consulting Service Pvt Ltd, Data Annotator - Intern

11/2025 – 03/2026

Mangalore

- Supervised a team of 6 annotators delivering multi-modal datasets (text, audio, video, image) for ML training, enforcing transcription, labeling, and ITN standards consistently.
- Conducted quality spot-checks on annotator outputs (accuracy, casing, punctuation, metadata), driving dataset accuracy to 95%+ and reducing labeling error rates.
- Monitored throughput and error rates, reported dataset readiness to leads, and onboarded new annotators on tools and guidelines.

ZIDIO Development, Data Science & Analytics - Intern

07/2025 – 09/2025

Remote

- Engineered data pipelines and interactive dashboards for 2 real-world projects using Python, Power BI, and AWS, delivering actionable insights on stock market trends and financial loan risk.
- Applied time-series forecasting and credit risk analysis techniques on 38,576+ records, improving decision-making accuracy by 30% through DAX-driven KPI reporting.
- Standardized data preprocessing workflows using Pandas and NumPy, ensuring clean, reusable datasets across both project deliverables.

PROJECTS

Financial Loan Data Analysis Power BI 🔗

- Architected an interactive dashboard to analyze 38,576 financial loan records, identifying risk trends and improving decision-making by 30%.
- Standardized loan records using Power Query and DAX, ensuring 100% data accuracy across KPI calculations.
- Identified high-risk borrower segments and profitability drivers, producing actionable BI insights for credit risk assessment.

Stock Market Analysis & Forecasting Dashboard 🔗

- Built a Streamlit web application that tracks live NSE stock data, enabling users to visualize market trends.
- Implemented 4 time-series forecasting models to predict stock price movements with accuracy validation.
- Engineered a scalable data flow using AWS EC2 and S3 for storage, Athena and IAM Roles for secure programmatic result exports.

Fitness Coach application 🔗

- Built a full-stack AI Fitness Coach web app using React, TypeScript, and FastAPI for personalized workout and nutrition planning.
- Implemented BMI, calorie, protein, and goal-based fitness recommendations with admin dashboard and user authentication features.
- Developed responsive frontend interfaces and integrated REST APIs with deployment on Vercel 🔗.

CERTIFICATIONS

- | | | | |
|---|---|--|---|
| • Data Analytics Job Simulation, Deloitte Australia — Forage (2025) | • Data Science & Analytics Internship Certificate, ZIDIO Development Pvt (2025) | • Cloud Application Developer, ROOMAN Technologies Pvt. Ltd (2025) | • Data Science Fundamentals, Codelabs System (2023) |
|---|---|--|---|

ACHIEVEMENTS

- Won back-to-back awards in the Technical Gaming category at college-level technical fests (2022, 2024)
